Landscape

Alex's Story

Meet Alex, a dedicated gardener with a 1000 sqft garden who was in need of an efficient irrigation system for his garden beds and proper sprinkler coverage for the grassy area. After speaking with our Irrigation Designer, Heather, the design process was pretty clear. Alex found the installation process to be relatively easy. He was interested in learning as much as he could about irrigation installation, and he found the drip system educational resources on DripWorks' website to be very valuable.

Alex was quite satisfied with the final design and found that Heather listened to his input and used her knowledge to create a functioning system tailored to his unique garden. Alex's experience with DripWorks' irrigation design is a testament to our ability to provide cost-effective and customized solutions for gardeners and landscapers.

"It's not expensive. If anyone is considering doing this themselves, they should go for it. The drip irrigation system has been working wonders for me."
