

DripWorks® IRRIGATION DESIGN

Rick's Story

Meet Rick, an avid homeowner with a passion for landscaping. His vision was to create a beautiful sod path through his property, a vision that hinged on the right irrigation. Rick embarked on a landscaping journey with Heather, DripWorks' irrigation designer. Her guidance made it easy for Rick to determine what he needed for his project. Heather crafted irrigation diagrams with specifications, transferring them onto Rick's map.

Rick elaborated, **"She walked me through all of it and I was quickly able to create my own formulas... in the end, I really got something that works."** Rick appreciates the beginner-friendly approach of DripWorks: Heather recommended easy lock fittings that required no tools, making installation a breeze.

"I highly recommend this service to anyone with no type of experience."

"I feel like I have good support even after the design is complete."

Rick's project started with a 100 ft roll of dripline, and its success prompted him to acquire another 100 ft for the opposite side of his property. DripWorks not only fulfilled Rick's sod path vision but also empowered him with the confidence and knowledge to manage his irrigation system effectively.
